Figure 4

Web Site Managers

Site
Establish site-wide features and settings. Set up listener settings. Control logs, system purges, and news.

Style
Create and manage styles, which control frames, navigation bars, text, color, and background images.

Content Managers

Folder
Manage site structure and navigation. Control access by users and groups. Apply styles and images.

Category
Create and manage categories and associate them with graphic images.

Perspective
Create and manage perspectives and establish their display choices.

Custom Item Type
Create custom item types and establish optional attributes and procedures.

Access Managers

Group
Create and manage groups. Assign group administrators.

User
Create and manage users. Assign administrative privileges to a single user.

Privilege
Assign administrative privileges to users.

Personal Information
Enter information for user: TEST_SITE2_ADMIN

Toolbox

Site Statistics
Produce and view online reports for site and folder page requests, searches, user access privileges.

Search
Establish basic search features for Oracle and Internet search engines, and advanced search features for *inter*Media Text searches.
